

# Need To Know Building Products

2021 EDITION

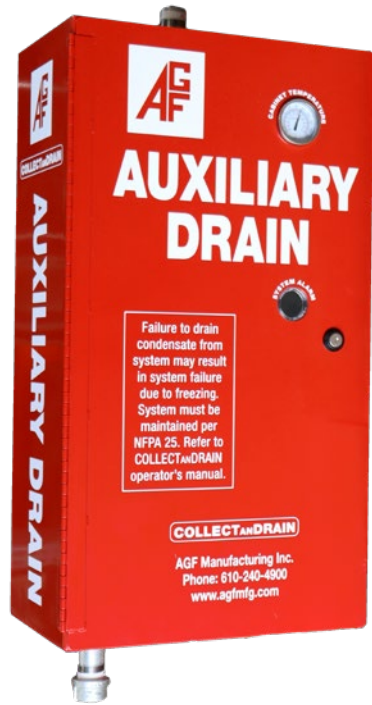

PRESENTED BY  facilitiesnet

AGF MANUFACTURING, INC.

## Keep Sprinklers from Freezing with Self-Maintaining Low Point Drains

The AGF COLLECTANDRAIN® Models 5450 and 5400 are self-maintaining and automatic auxiliary drains with freeze protection that automatically drain collected condensation in a dry fire sprinkler system. The easily mounted, lockable, steel cabinet prevents vandalism, improper maintenance and keeps the facilities sprinkler system operational and protected from fire.

AQUALIS STORMWATER MANAGEMENT

## Nationwide Lift Station and Pump Management Services

**AQUALIS**

When lift stations are not maintained, the system can back up, overheat, or fail. AQUALIS provides overall management, maintenance, repair, monitoring and inspections of lift stations and pumps of all kinds, to help prevent system malfunctions. AQUALIS can customize a lift station program to meet the specific needs of our customers for single sites or multi-state organizations.

## GENERAL PIPE CLEANERS

# JM-1000 Stainless Steel Hoses Boost Performance & Cleaning Power

General Pipe Cleaners enhanced the performance and cleaning power of its popular JM-1000 Mini-Jet™ with stainless steel braid supply and jetter hoses. The lightweight Mini-Jet clears grease, sand, and ice from small drain lines with high-pressure, wall-to-wall water spray. The durable abrasion-resistant, stainless steel braided hose with Teflon® core improves cleaning power and smoothly traverse small drain lines.

## LOGISON ACOUSTIC NETWORK

# Successful Organizations Put People First

Today, health and safety are top of mind, but there's also a need to address other important concerns. Acoustics has a profound impact on concentration, privacy and well-being. With the most agile sound masking technology on the market—and a new residential solution for work-from-home employees—we can help your staff remain comfortable and productive... no matter where they are.

## SIKA SARNAFIL

# Build Superior Roofs with Wind Vented Systems

Vented systems, like all roof assemblies, are dependent on proper design, installation, and attention to detail. An airtight substrate below the new membrane is a critical element in the performance of these systems. A cost-effective, high-wind resistant roofing system combining Sika Sarnafil membrane and WindSmart vents covered by a Sika Sarnafil's warranty up to 30 years. Ideal for re-roof/re-cover solutions.

## TERRACYCLE REGULATED WASTE

Crush spent fluorescent lamps of any length into 100% recyclable material while capturing over 99.99% of the vapors released with the Bulb Eater®.

Hold up to 1,350 4-foot fluorescent lamps, freeing up valuable storage space that would otherwise be filled with boxes of spent lamps. It reduces handling and related labor costs, too.

## UV RESOURCES

### Destroy Pathogens with Germicidal UV-C

The CDC and the ASHRAE Epidemic Task Force recommend germicidal UV-C to mitigate the spread of infectious pathogens.

This White Paper will explain how facility managers can determine the necessary UV-C dose to inactivate the SARS-CoV-2 virus in a moving airstream. Operational factors such as air volume, air temperature and velocity, fixture spacing, and UV intensity are discussed.

WOOSTER PRODUCTS INC

## “Make Every Step a Safe One” with Stairmaster by Wooster Products

Stairmaster® provides a convenient, easy to install method of permanently repairing damaged or worn stair treads. The use of heat treated, corrosion resistant aluminum with a diamond hard aluminum oxide in the filler assures long tread life under heavy pedestrian traffic. Stairmaster® is appropriate for both indoor and outdoor use.
